ORTHO-MAX Jacket DUO

FIM approved

► Chest protector made of viscoelastic foam (protector removable)

► Optimized fit of removable CE protectors (Level 2) on shoulder and elbow

► Generous mesh-inserts ensure optimal ventilation

► Additional protection layer in the area of the spine

► Height adjustable, integrated kidney belt

► Anatomical fit ensures increased comfort

► Integrated rib protection

► Anatomically adapted form of the CE back protector (Level 2) guarantees perfect protection with maximum mobility and increased wearing comfort

ORTHO-MAX Jacket DUO

Protection jacket offering excellent upper body protection with CE certified chest, back, shoulder and elbow protection according to the highest standard - Level 2; additionally integrated collarbone and rib protection. Breathable materials ensure

maximum comfort and ventilation. Encloses the body regions well and does not slip even in the event of a fall. Thus, the jacket protects where it needs to protect.

Sizes: S - XL

Jacket DUO 1 pc. € 399.00

The heart of the **ORTHO-MAX** protector family is the back protector, level 2, made of a new visco-elastic memory foam, certified to CE-EN 1621-2. The latest generation developed according to biomechanical criteria is even lighter and more breathable. It impresses with even better shock absorption values of less than 5.5 kN.

ORTHO-MAX Dynamic

The back protector ensures optimal freedom of movement and perfect breathability through perforation of the protector plate. This consists of several layers of a visco-elastic memory foam and thus ensures a very high energy consumption.

The integrated plastic penetration protection protects the spine from pointed and sharp objects.

Sizes: XS **JUNIOR**, S - XL

Size XS JUNIOR 1 pc. € 149.00
Size S - XL 1 pc. € 169.00

Coolneck	1 pc.	€ 10.95

Carbon-fibre Shoulder Brace

Individually made after scan or plaster cast. It can be used for the prevention of injuries such as the treatment thereof after operations. Since it is very light it ensures a high wearing comfort.

The adjustable straps can limit the movement of the upper arm either statically or dynamically and bilateral use is possible.

Price on request

Version polyethylene (without picture) Prefabricated and can be fitted and adjusted individually.

Version polyethylene 1 pc. € 399.00

Carbon-fibre Elbow Brace

Individually made after plaster cast. It is used for injuries and after surgery on the elbow and stabilizes the joint effectively. The elbow brace is suitable for extreme sports and is adapted to the

respective application. Due to its low weight, it offers excellent wearing comfort. Webbing and joints can limit arm movement statically or dynamically. Double-sided supplies are possible.

Price on request

Manu-MX made of Carbon-fibre

Individually manufactured from a plaster mould and made of carbon-fibre, thus making it extremely light yet stabil. Limitation of movement is adjusted individually according to the specific injury or the

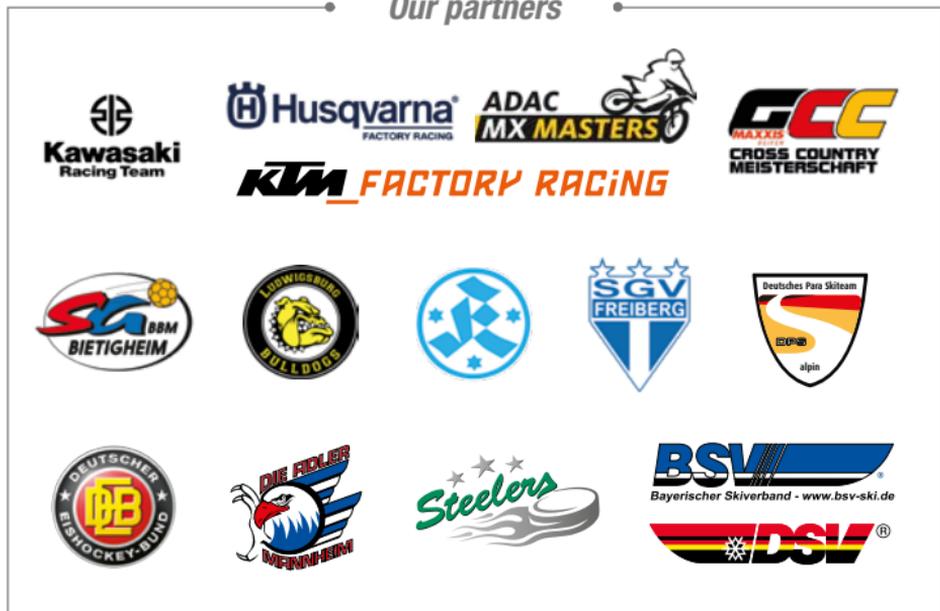

post-surgery requirements and can be readjusted at all times.

The brace maintains the gripping function and movements to the side and is worn over the glove.
